Mobile Apps:	Android(Java), IOS(Swift).
Operation System:	Linux, Mac, Windows.
Others:	SQL, Git, Github.

CO-CURRICULAR ACTIVITIES

Member

Hardware Acceleration Club of KUET
(HACK) Since – May 2022

Member

Special Group Interested in Programming
Contest (SGIPC) Since – April 2022

Member

Bit2Byte - Software Research &
Development Community of KUET

EDUCATION

Bachelor of Computer Science (B.Sc.)
CGPA- 3.72 (till 5th semester)
Graduation- February 2026 (Expected)
Khulna University of Engineering & Technology
(KUET)
Khulna-9203, Bangladesh

MAJOR PROJECT(S):

Blood Bank Management

Technologies- OOP in C++

In my project I implemented all OOP concept
Encapsulation, Polymorphism, Inheritance &
Abstraction.

Grocery Shopping

Technologies- PHP, Laravel, MySQL.

A sleek grocery shopping web app with Laravel.
Users register, browse a detailed catalog, and enjoy
smooth checkout. Features: responsive design,
search, reviews, promotions. Emphasizes security,
analytics, multilingual support.

Railway Management System

Technologies- Android(java), API, Firebase.

There are two type of login system, one is admin
side and the other is user side. As an admin, He can
update, delete, the train schedule between two
stations. I also use payment gateway using master
card.

Bangla Book Recommendation System

Technologies- Django, ML, SQLite.

Developed a full stack Website for Bangla book
recommendation system based on Machine Learning
algorithm and Content based filtering method.

Employee Management System

Technologies- Spring boot, PostgreSQL, React Js

Developed a full stack Website using Spring boot as
a backend and React Js as a frontend. I used Rest
Controller to build rest APIs.
